

INFORMATION BULLETIN

Serial No. 002

Aircraft Type T67A

TITLE

OPTIONAL MODIFICATIONS

The following modifications have been introduced on the latest T67A aircraft and are available to owners/operators as an optional extra. (Price on application).

Mod No.

M.33 Alternator warning sensor and lamp installation.

This Mod is introduced to provide a warning within 5 seconds of an alternator/charging system failure.

M.67 Introduction of shoulder strap extension.

This mod introduces a means of extending the length of the shoulder harnesses. This is of particular benefit in the flying school/training role.

M.71 Fitting of a T67B nosewheel fork, plus adaptor to T67A nosewheel leg.

This mod facilitates the fitting of a larger wheel (5.00 x 5) giving increased propeller tip to ground clearance.

M.72 Nosewheel steering limitation markings.

This mod is introduced as a ground handling aid to give a visual indication to the driver of a towing vehicle when he is reaching the limit of the nosewheel steering, thus preventing damage to the steering mechanism.

M.73 Elevator trim wheel support bracket.

This modification has been introduced to improve the clearance between the elevator trim wheel and the flap selector lever at the flaps fully down position.
