

VEHICLE INTEGRATION

Marshall Land Systems has decades of experience designing, developing and integrating complex sub-systems into a wide range of platforms, including land vehicles and other base structures, to support defence forces around the globe in transporting essential equipment, personnel and supplies over land.

Some of our vehicle partners to date include Mercedes, Scania, Rheinmetall MAN Military Vehicles (RMMV), Mack Defence, IVECO, Thales, Force Protection and Renault.

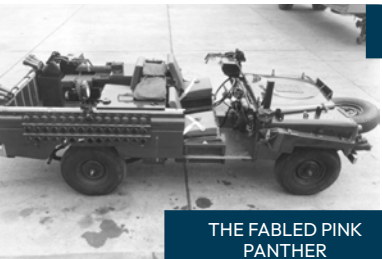

The Past

Marshall Land Systems has a heritage in providing bespoke platform design, manufacture and integration services dating back to at least 1919, when our first Ambulance was delivered to the Home Ambulance Service.

A rich heritage of platform systems delivered in the time since includes Special Forces Land Rover variants such as the Pink Panther, Recovery Systems, Equipment Transporters and Light Anti-Tank Conversions. Across the years, there is barely a household platform provider with whom Marshall hasn't collaborated.

THE FIRST AMBULANCE

HEAVY EQUIPMENT TRANSPORTER

LIGHT ANTI-TANK LAND ROVER CONVERSION

PALLETISED LOADING SYSTEM

The Present

Marshall Land Systems is credited with delivering or supporting a number of platforms in service today, both within the UK MoD and globally. Examples include the UK's MAN HX SV Fleet, Land Rover Ambulance and C2 variants, Land Ceptor's Fire Unit Support Vehicles and the Boxer Ambulance variant. Most recently, Marshall have delivered the UK's new C-EOD fleet known as GASKET,

GASKET VEHICLES

The Future

Marshall Land Systems remain an OEM-agnostic provider of vehicle body manufacture, platform and mission system integration and through life support. We are now on contract as a key member of the Power Team, delivering Canada's Logistic Vehicle Modernisation Programme.

Through our long history in delivering a wide variety of systems we have built deep relationships across the platforms marketplace, with whom who are now actively seeking positions on exciting new projects.

For a full set of capabilities please contact the Marshall Land Systems Sale team or take a look at our website.
